

Electric Eel Model RF

Drain Cleaner, Electric Auto-Feed, 3/4" x 100'

Item Number: EE-RFK34IC100

The Model R is designed to clean 3"-6" lines for distances up to 100' and is ideal for both the homeowner and contractor. The auto-feed function allows the operator to advance and retrieve the cable with the push of a lever. The cable runs through a guide spring which keeps hands off the rotating cable for added safety. The unit runs 3/4" cable and is built on a rugged 1-1/4" steel tubing frame with an open cage for quick inspection and easy cleaning. Large 10" wheels allow for easy maneuvering and a 20' power cord with a built in GFCI protects the operator. A typical application for the Model R is cleaning tree roots from a main sewer line that runs from the house to the street. Snap-lock tool connector holds cleaning tools securely in place; no screws required to connect tools.

Features

- Auto-feed function allows the operator to advance and retrieve the cable with the push of a lever
- Guide spring keeps hands off rotating cable for added safety
- Designed to clean 3"-6" lines at distances up to 100'
- "Tri-Max" inner core cable - the toughest cable in the industry

- Electric switch with pneumatic control frees up both hands while working
- 20' power cord with GFCI
- Large 10" wheels
- Clutch reduces risk of cable damage and provides overload protection
- Kit includes four cleaning tools and a spanner wrench

Specifications
