SDS Max Dust Extraction Attachment

Item Number: MI-5317DE

Our SDS Max Dust Extraction Attachment provides you with a solution for the regulation on respirable crystalline silica dust management (29 CFR 1926.1153). The SDS attachment is optimized for all drilling depths and any hole ranging from 1/4" and 2-3/4" in diameter. The drill dust shroud has removable brush rings, increasing your tool's life when performing larger dry coring applications. Attaching the hammer drill dust collector to our MILWAUKEE® 8 Gallon Dust Extractor (8960-20) provides you with a complete OSHA Table 1 compliant solution.
