

L.B. White PC31

Portable Evaporative Cooler, 3100 CFM

Item Number: LB-PC31

An evaporative cooler, also known as a swamp cooler, is a device used for cooling indoor or outdoor spaces by evaporating water. It works on the principle of evaporative cooling, where heat is absorbed from the air as water evaporates.

Features

- Automatic pump shut-off: When a customer forgets to fill the tank it won't come back from rental with burned-out parts
- Easy water fill: Fill 10-gal tank from manual door for 3 to 4 hours of runtime or leave connected for continuous fill
- Adjusts to space: Lockable wheels and lightweight design provide ultimate portability while louvers can adjust airflow left-to-right
- Quiet operation: Less than 60 dB
- Safe: GFCI connection with low amp draw suitable for most available circuits
- Durable: UV protected case

Specifications

Coverage	950 sq. ft
Tank Size	10.3 Gal
Run Time (approx)	3-4 Hours
Dimensions	38" x 24" x 17"
Weight (LBS)	45
