Patron SP-05

3/4" Submersible Utility Pump

Item Number: PA-SP05

The Patron SP-05 submersible utility pump (also known as a roofers pump) is a versatile tool for various pumping needs. Designed for reliability and efficiency, this pump is perfect for draining water from flooded areas, emptying swimming pools, or assisting in rooftop water removal during construction or repairs. Its compact size and submersible design allow for easy deployment in tight spaces, ensuring quick and hassle-free water extraction wherever it's needed.

Features

- Durable aluminum construction
- Simple operation
- Convenient carrying handle
- Effective in many applications for moving greywater/stormwater
- Semi open, engineered plastic impeller
- Garden hose adapter included
- Cooling water jacket prolongs motor life
- Pumps down to a depth of 1/8”
