Centurion Pump (CP) CTB2S

Triplex Pump, 24mm Shaft, 4100 PSI, 8.5 GPM

Item Number: PA-P85120171B

The Centurion CTB2S Belt Drive Triplex Pump is engineered for professionals who demand extreme power and long-lasting durability. Designed and manufactured by CP, one of the most respected names in high-pressure pump technology, the CTB2S delivers an incredible 4,100 PSI of pressure at a flow rate of 8.5 GPM, making it one of the most capable and efficient pumps in the Centurion lineup. This model combines belt drive operation, triplex ceramic plungers, and industrial-grade brass construction to produce smooth, consistent performance under continuous-duty cycles. Whether used with gasoline or electric power, the CTB2S offers the perfect balance of high flow and controlled pressure for large-scale, heavy-duty cleaning operations. From fleet washing and factory maintenance to agricultural and marine applications, this pump is built to run cool, clean, and reliably for years — even in the most demanding environments.
